Dayana Arrieta

Fig. Image scaling by nearest neighbor

After the process of changing from csv data to images, these images are compressed using the nearest neighbor image scaling method.

LZ77 Compression Algorithm Design

Fig. Compression with LZ77 algorithm

RLE Compression Algorithm Design

4	4	5	5	5	5	4	4	4	6	8	8	8	8	8
---	---	---	---	---	---	---	---	---	---	---	---	---	---	---

4	2	5	4	4	3	6	1	8	5
---	---	---	---	---	---	---	---	---	---

Fig. Compression with algorithm

LZ77 Compression Algorithm Complexity

	Time Complexity	Memory Complexity
Image compression	$O(N)$	$O(N)$
Image decompression	$O(N)$	$O(N)$

Time and memory complexity of the LZ77 algorithm. N is the input/csv file.

RLE Compression Algorithm Complexity

	Time Complexity	Memory Complexity
Image compression	$O(N)$	$O(N)$
Image decompression	$O(N*M)$	$O(N)$

Time and memory complexity of the Run Length encoding algorithm. N is the input and M is the length of the array.

LZ77 Time and Memory Consumption

RLE Time and Memory Consumption

RLE Average Compression Ratio

	Compression Ratio
Healthy Cattle	2 : 1
Sick Cattle	2 : 1

Average compression ratio for Healthy Cattle and Sick Cattle.

LZ77 Average Compression Ratio

	Compression Ratio
Healthy Cattle	2 : 1
Sick Cattle	2 : 1

Average compression ratio for Healthy Cattle and Sick Cattle.

THANK YOU!
